

Beverage & Food ReUseable Solutions

JECO produces a wide range of rotational molded applications including AQUA CADDY. For over a decade, Aqua Caddy has been in service. The Aqua Caddy allows for customized shipments since they hold both 3 and 5 gallon bottles, and can be used in both large and small vans. The Aqua Caddy also maintains high standards of hygiene by keeping both the bottles and plant clean. We additionally produce a wide variety of other roll pallets for various drums and roll goods.

Numerous Roll & Cylindrical Pallet Applications

Meat, Poultry, Seafood, Frozen Foods & More

JECO products are ideal for food handling applications. JECO uses only virgin LLDPE resin and colorants which are FDA approved, fully biodegradable, and can be recycled. The smoothness of JECO pallets ensures that there are no cracks or fractures in which bacteria can grow. The strength of JECO pallets allows them to withstand extreme loading conditions and to be used safely in open-racking situations. JECO pallets can withstand extreme temperature variations from either steam cleaning or frozen cold storage facilities. JECO pallets are fully compatible with other packaging such as corrugated, plastic, and steel. We have over 200 tooled pallets

Ideal for -20°C to hot steam cleaning in repetitive use

Anti-microbial materials - Microban™
