

- Jeco containers and pallets are rotationally molded providing an accurate and sturdy platform to support heavy and critical loads without deflection or breakage.

- Jeco pallets are ideal for automated conveyor systems to racking storage. Highly accurate dimensions for ASRS use. Barcode and RFID can be added too.

- ESD: With both our Roto-molded and/or Thermoformed applications, Jeco can offer static dissipative materials and features like inserted ground strips to reduce ESD.

- Jeco products do not absorb moisture or fluids. They are impervious to almost all known solvents. They are chemically inert, except in extremely high acid or alkali concentrations. They can also include biocide anti-microbial additives.

- Jeco products are easy to clean, either with steam, high pressure water spray or chemicals. The smooth structure also allows full access to all parts of the product.

- Jeco products can withstand extreme **cold** and **hot** environments without issue

- Lease options available. Veteran Owned Small Business
